

★ Starting Now: High-Fidelity Page 1 — Landing Page (Style B)

Below is the first full page design.

After you confirm, I will produce pages 2–13 one by one.

🎨 High-Fidelity UI Spec – Landing Page (Clean Web3 Startup Style)

Overall Theme

- Light minimal Web3 UI
- Soft gradients
- Clean geometry
- Glassmorphism elements
- Blue/purple brand accents
- Ample whitespace

🧱 Layout Structure

■ Header / Navigation

Height: 88px

Background: Transparent → becomes glass on scroll

Layout:

- Left: Logo (DecentraStore)
 - Font: Inter / Poppins SemiBold, 24px
 - Color: #1A1A1A
- Center nav links (spacing 36px):
 - Features
 - How It Works
 - Pricing
 - Network
 - Docs
- Right:
 - Login (text button)
 - Get Started (gradient button)

Get Started Button

- Gradient: linear(135°, #4A65F6 → #8A4DFF)
- Padding: 14px 28px

- Radius: 12px
- Shadow: 0 8px 20px rgba(76,90,255,0.25)

Hero Section

Left Column

Heading:

“Decentralized Cloud Storage Built for Speed, Privacy & Freedom.”

- Font: Poppins Bold, 48px
- Line Height: 56px
- Color: #1A1A1A

Subheading:

“Store your files across a global peer network with AES-256 encryption and blockchain-backed integrity.”

- Font: Inter Medium 20px
- Color: #4A4A4A

Primary CTA:

- Text: Start Storing →
- Style: Same gradient as header button

Secondary CTA:

- White background
- Border: 1px solid rgba(0,0,0,0.1)
- Text: “Become a Storage Node”

Right Column — Dynamic Illustration

A modern 3D Web3 illustration:

“File → Encryption → Chunking → Distributed Peers”

Use visuals inspired by page 3 of your PDF (System Workflow).

Decentralized-Cloud-Storage-Sys...

Features Section

Grid: 4 columns → 32px spacing

Each Card:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)

- Radius: 16px
- Padding: 32px

Cards:

1. **End-to-End Encryption**
Icon: lock outline
Text: From PDF Page 6 (“Client-Side Encryption”).
2. **Decentralized-Cloud-Storage-Sys...**
3. **Privacy by Design**
“No centralized access point. No third-party trust.”
4. **High Availability**
Based on N-of-M redundancy (PDF Page 2).
5. **Decentralized-Cloud-Storage-Sys...**
6. **Scalable Architecture**
“Designed for millions of storage nodes.”

How It Works Section

Five-step infographic (from PDF Page 3).

Decentralized-Cloud-Storage-Sys...

Visual Style:

- Circular numbering (1–5)
- Soft pastel gradients
- Step Lines (Diagonal, light grey)

Steps:

1. **Choose File**
2. **Encrypt (AES-256)**
3. **Chunk**
4. **Distribute to Peers**
5. **Metadata Recorded on Fabric**

Brand Showcase Bar

Logos of:

- Hyperledger
- IPFS
- FastAPI
- MongoDB

(This matches your tech stack from PDF Page 5.)

Pricing Preview

3-tier pricing grid:

- Free Tier
 - Pro Tier
 - Enterprise Tier
- (You can swap “pricing” for “token-based economics”.)

Footer

Columns:

- Product
- Solutions
- Resources
- Contact

Lower bar:

“© 2026 DecentraStore — Decentralized Cloud Storage System”

High-Fidelity Page 2 — User Registration / Node Setup (Clean Web3 UI)

Style: Option B — Light, Minimal, Modern Web3

Page Purpose

This page is responsible for:

- Generating the decentralized identity
- Creating RSA-2048 keypair
- Selecting storage contribution
- Downloading keystore file
- Proceeding to login

This replaces the traditional username/password signup.

1. Overall Layout

Canvas Width: 1440px

Top Padding: 96px

Centered card (max-width: 680px)

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 20px
- Padding: 48px
- Shadow: 0 32px 80px rgba(0,0,0,0.06)

2. Header Section of Card

Title:

“Create Your Decentralized Identity”

- Font: Poppins Bold, 32px
- Color: #1A1A1A
- Spacing below: 8px

Subtitle:

“Your identity is generated locally and never leaves your device.”

- Font: Inter Regular, 16px
- Color: #6A6A6A
- Spacing below: 32px

3. Stepper Component

Horizontal 3-step indicator:

[1 Generate Keys] — [2 Storage Setup] — [3 Download]

Style:

- **Active bubble:**
 - Size: 32px circle
 - Background: gradient(135°, #4A65F6 → #8A4DFF)
 - Text: white, 16px, bold
- **Inactive bubble:**
 - Background: #EDEDED
 - Text: #888
- **Connector line:**
 - Height: 2px
 - Color active: #4A65F6
 - Color inactive: #E2E2E2

4. Step 1 – Generate Keys

Section Title:

“Generate Secure RSA-2048 Keypair”

- Font: Inter SemiBold, 20px
- Color: #1A1A1A
- Spacing: 12px

Description:

“As per our security model, your private key never touches the network.”

Tint text: #555

Button:

Generate Keys

- Width: full
- Padding: 16px
- Gradient: #4A65F6 → #8A4DFF
- Radius: 12px
- Shadow: 0 12px 24px rgba(76,90,255,0.2)
- Icon: key outline

After Generation:

Show a success state card:

- Background: #F3F7FF
- Border: 1px solid #DCE6FF
- Radius: 12px
- Icon: ✓ inside circle
- Text:
“Keypair generated successfully.”

Add monospace preview:

Public Key Fingerprint: 9A:34:F1:55:AA...

5. Step 2 – Storage Contribution Slider

Section Title:

“Choose the Storage You Want to Contribute”

Slider Component:

- Range: 1 GB → 100 GB
- Track: #E3E3E3
- Filled Track: #4A65F6
- Thumb:
 - Size: 20px
 - Border: 4px solid white
 - Shadow: 0 4px 12px rgba(0,0,0,0.12)

Value bubble:

Floating bubble above thumb:

24 GB

- Background: #FFFFFF
- Shadow: 0 6px 20px rgba(0,0,0,0.1)
- Radius: 12px
- Padding: 6px 12px

Info text:

“You will earn tokens proportional to the storage you share.”

Color: muted #6A6A6A

6. Step 3 — Download Identity File

Download Card:

- Background: #F8F8F8
- Border: 1px solid rgba(0,0,0,0.05)
- Radius: 14px
- Padding: 24px

Contents:

- Icon: download cloud
- Text:
 - “Your encrypted identity file is ready.”
 - Font: Inter Medium, 16px
 - “Store this somewhere safe. You’ll need it to log in.”

Download Button:

Download Keystore.json

- Gradient: blue → purple

- Width: full
- Padding: 18px
- Radius: 12px

Below:

⚠ Security Warning

- “We cannot recover this file if lost.”
- Color: #D64545
- Icon: alert-triangle

➡ 7. Continue Button

Continue to Login →

- Right arrow icon
- Text color: white
- Gradient
- Align: right side

⬅ 8. Footer (Minimal)

- Links: Privacy Policy | Docs | Contact
- Font: Inter Regular 14px
- Color: #9A9A9A
- Center aligned

🎨 High-Fidelity Page 3 — Decentralized Login Page

Style: B — Clean Web3 Modern UI

This is the login page where users authenticate using their keystore.json + passphrase, not email/password.

This aligns with your decentralized identity model.

★ 1. Page Layout (1440px canvas)

Centered login card with soft shadows and Web3 gradients.

Canvas

- Background: #F7F9FC
- Top padding: 120px

- Center alignment

★ 2. Login Card

Dimensions:

- Max width: 480px
- Background: #FFFFFF
- Radius: 20px
- Padding: 48px
- Border: 1px solid rgba(0,0,0,0.06)
- Shadow: 0 24px 60px rgba(0,0,0,0.07)

★ 3. Header Section

Title

“Login to Your Node Identity”

- Font: Poppins SemiBold, 28px
- Color: #1A1A1A
- Margin-bottom: 8px

Subtitle

“Upload your keystore file to unlock your decentralized account.”

- Font: Inter Regular, 16px
- Color: #707070

★ 4. Keystore Upload Component

File Drop Area:

- Height: 140px
- Background: #FAFBFF
- Border: 2px dashed #D0D7E7
- Radius: 14px
- Centered icon + text

Icon:

- Cloud-upload outline
- Color: #4A65F6
- Size: 42px
- Margin-bottom: 12px

Text inside:

“Drag & drop your keystore.json here, or click to browse.”

- Font: Inter Medium, 15px
- Color: #4A4A4A

After File Selected:

A card appears below:

- Background: #F1F6FF
- Text:
Keystore loaded successfully
File name: keystore_92af.json
- Icon: green check
- Border: 1px solid #DCE7FF
- Radius: 12px
- Padding: 16px

★ 5. Passphrase Input Field

Label:

“Enter Passphrase”

- Font: Inter Medium, 14px
- Color: #555

Input:

- Height: 50px
- Background: #FAFAFA
- Border: 1px solid rgba(0,0,0,0.07)
- Radius: 12px
- Padding: 0 18px
- Font: 16px

Suffix icon: eye toggle (show/hide password)

★ 6. Login Button

“Unlock Identity →”

- Full width
- Height: 56px
- Gradient: 135° (#4A65F6 → #8A4DFF)
- Text color: #FFFFFF

- Font: Inter Semibold, 16px
- Radius: 12px
- Shadow: 0 12px 20px rgba(76,90,255,0.25)

Disabled state (before file upload):

- Background: #C9C9F0
- Shadow: none

★ 7. Security Notice

! “Your private key never leaves your device.”

- Font: Inter Medium 13px
- Color: #A64B4B
- Icon: small shield-lock
- Center aligned
- Margin-top: 12px

This comes from your Security Features section in the PDF (Page 6).

Decentralized-Cloud-Storage-Sys...

★ 8. Footer

Minimal:

- Text:
Need help? Read documentation →
- Color: #6A6A6A
- Font: 14px
- Margin-top: 24px
- Centered

🎨 High-Fidelity Page 4 – User Dashboard (Light + Dark Mode UI)

Style Default: Light Mode

Optional: Dark Mode toggle

This is your main user-facing dashboard after login.

★ 1. Global Theme Switcher (Light / Dark Button)

Placement:

Top-right corner of the main navbar.

Design (Light Mode):

- Icon: 🌙 (Moon outline)
- Label: “Dark Mode”
- Toggle style:

[○——●]

- Background: #E3E6EE
- Filled track: #4A65F6
- Thumb: white circle, shadow

Design (Dark Mode):

- Icon: ☀️ (Sun icon)
- Label: “Light Mode”
- Track: #1E2533
- Filled track: #8A4DFF
- Thumb: light grey

Behavior:

- Smooth 300ms transition:
 - background
 - cards
 - borders
 - typography
 - icons

★ 2. Dashboard Layout Structure

Grid layout like major cloud dashboards (e.g., AWS S3 / Filecoin Explorer).

Two-column fluid layout

- Left (65%) → Activity
- Right (35%) → Stats

Light Mode Background:

- #F7F9FC

Dark Mode Background:

- #0D1117 (GitHub-like)

★ 3. Top Navigation Bar

Light Mode:

- Background: #FFFFFF
- Shadow: 0 2px 12px rgba(0,0,0,0.04)
- Logo: Dark version

Dark Mode:

- Background: #141820
- Shadow: 0 2px 12px rgba(0,0,0,0.4)
- Logo: White version

Menu Items:

- Dashboard
- Upload
- Retrieve
- Wallet
- Storage Node
- Settings

Style:

- Light: #444 hover #000
- Dark: #C9D1D9 hover #FFFFFF

★ 4. Header Summary Bar

This matches your PDF network metrics (PDF Page 7) and HTML dashboard.

Four quick stats:

- Peer ID
- Network Status
- Uptime
- Active Peers

Light Mode Card:

- Background: #FFFFFF

- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 16px
- Icons: colored (green for online)

Dark Mode Card:

- Background: #161B22
- Border: 1px solid rgba(255,255,255,0.05)
- Icons: neon accents

★ 5. Left Column – Token Transactions (Primary Panel)

Section Title:

“Token Transactions”

Font: Poppins SemiBold 20px

Filter Tabs:

- All
- Credits
- Debits
- Storage
- Upload
- Rewards

Light Mode:

- Tab active: gradient underline (#4A65F6 → #8A4DFF)
- Inactive: #B8B8B8

Dark Mode:

- Active: neon purple underline
- Inactive: #7D8697

Transaction Card:

- Light:
 - Background: #FFFFFF
 - Border: rgba(0,0,0,0.05)
- Dark:
 - Background: #1A1F2A
 - Border: rgba(255,255,255,0.05)

Transaction content:

- Icon
- Title
- Amount (+ green / – red)
- Timestamp
- Tx Hash (monospace)

★ 6. Left Column – My Files (Second Panel)

File Item:

- File name
- Size
- Upload time
- Chunk info
- Replication Factor
- Quick actions (Download, Details)

Light Mode card:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)

Dark Mode card:

- Background: #1C212E
- Border: none
- Glow on hover

★ 7. Right Column – Token Summary

Token Balance Card

- Shows:
 - Large DST token count
 - Gradient background
 - Small converter (DST → USD)

Light Mode:

- Gradient: #4A65F6 → #8A4DFF
- Text: white

Dark Mode:

- Gradient: #8A4DFF → #4A65F6
- Text: white with stronger glow

★ 8. Right Column — Storage Contribution Card

This matches your PDF architecture (Page 4) and HTML storage card.

Stats:

- Storage Provided
- Storage Used
- Free Space

Light Mode:

- Background: #FFFFFF
- Border: rgba(0,0,0,0.08)
- Bar: green gradient

Dark Mode:

- Background: #161B22
- Bar: neon green

★ 9. Right Column — Earnings Card

Light Mode:

- Background: soft green gradient:
#CFFFD5 → #9CE0A5

Dark Mode:

- #113322 deep green tone
- Bright neon text for earnings

★ 10. Theme Behavior Summary

Switching the theme updates:

- Navbar
- Cards
- Borders
- Background
- Typography
- Icon colors
- Gradients
- Accent colors

User preference is saved in LocalStorage
(theme="light" or "dark")

High-Fidelity Page 5 – Upload File Page

Includes Light Mode / Dark Mode switch, consistent with your previous screens.

This is the page where users upload files to the decentralized network.
It visually shows encryption → chunking → distribution → blockchain logging.

★ 1. Page Purpose

This page allows users to:

- Select or drag files
- Preview meta info
- Choose replication factor
- Choose distribution strategy
- Upload encrypted chunks
- View animated progress
- See assigned peers
- View file hash + metadata

★ 2. Page Layout Structure

Two-column layout:

- Left: Upload panel (main functional area)
- Right: Upload history + metadata

Theme Switcher:

Top-right, identical to dashboard:

- 🌙 Dark Mode
- ☀️ Light Mode

★ 3. Light Mode – Visual Style

Background:

- #F7F9FC

Upload Card:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.05)
- Radius: 20px
- Padding: 32px

Typography:

- Inter / Poppins
- Title: #1A1A1A
- Secondary text: #6A6A6A

UI Highlights:

- Gradients: #4A65F6 → #8A4DFF
- Clean shadows

★ 4. Dark Mode – Visual Style

Background:

- #0D1117

Upload Card:

- #161B22 background
- Border: 1px solid rgba(255,255,255,0.06)

Typography:

- Main: #E6EDF3
- Secondary: #9BA3AE

UI Highlights:

- Neon gradients
- Glow edges for progress bars
- Brighter peer icons

★ 5. Upload Panel (Left Column)

Section Title:

“Upload Files to the Decentralized Network”

- Poppins SemiBold 24px
- Light mode: #1A1A1A
- Dark mode: #F4F6F8

★ 6. Drag & Drop Upload Area

Dimensions:

- Height: 220px
- Radius: 16px
- Center-aligned elements

Light Mode:

- Background: #FAFBFF
- Border: 2px dashed #D0D7E7

Dark Mode:

- Background: #1C212E
- Border: 2px dashed #2E3441

Inside Content:

- Icon (cloud upload)
 - Light: #4A65F6
 - Dark: #8A4DFF
 - Size: 48px

Text:

“Drag & drop files here or click to browse”

- Light: #4A4A4A
- Dark: #C9D1D9

★ 7. File Preview Card (After File Selection)

Display:

- File Name
- File Size
- Estimated Chunk Count
- Type
- Security badge “AES-256 Encryption Enabled”

Light Mode Card:

- Background: #F5F7FF
- Border: 1px solid #D8E2FF
- Icon: blue shield

Dark Mode Card:

- Background: #1B2231
- Border: 1px solid #3B4254
- Icon: neon purple shield

★ 8. Settings Section (Dropdowns)

Replication Factor

Options:

- 2 — Basic
- 3 — Recommended
- 5 — High Security

Distribution Strategy

- Auto
- Geographical
- Reputation-based
- Manual Selection (opens modal)

Dropdown Style (Light):

- Background: #FFFFFF
- Border: rgba(0,0,0,0.06)
- Text: #1A1A1A

Dropdown Style (Dark):

- Background: #161B22
- Border: rgba(255,255,255,0.1)
- Text: #E6EDF3

★ 9. Upload Button

Style:

- Full width
- Height: 56px
- Gradient: #4A65F6 → #8A4DFF
- Text: white
- Radius: 12px
- Shadow: 0 12px 20px rgba(76,90,255,0.25)

Disabled State:

- Light: #C9C9F0
- Dark: #2F3550

★ 10. Upload Process Animation

Stepper (Horizontal):

Encrypting → Splitting → Selecting Peers → Recording Blockchain → Uploading Chunks → Completed

Light Mode:

- Active: blue gradient
- Inactive: grey

Dark Mode:

- Active: neon purple
- Inactive: dim grey

Progress Bar:

- Light:
 - Track: #E6EAF1
 - Fill: gradient
- Dark:
 - Track: #212732
 - Fill: neon blue/purple

★ 11. Peer Assignment Visualization

Grid of peers:

- Each peer is a small pill:
 - ID: peer-023
 - Location: US-West
 - Reputation: High

Light Mode:

- Background: #FFFFFF
- Border: rgba(0,0,0,0.08)

Dark Mode:

- Background: #202734
- Glow border: rgba(138,77,255,0.4)

★ 12. Right Column — Recent Uploads

Table/List:

- Filename
- Size
- Chunks
- Replication
- Status
- Timestamp

Light:

- Rows: alternating light grey
- Text: #444

Dark:

- Rows: alternating #161C26
- Text: #D1D9E6

Status Colors:

- Success: green
- Failed: red
- In Progress: purple

Upload File Page — High-Fidelity (Light + Dark Mode) CREATED

This page now matches your project's tech, workflow, and branding.

High-Fidelity Page 6 — Retrieve File Page (Light + Dark Mode)

This page enables users to retrieve files using File Hash / CID, fetch distributed chunks from peers, verify integrity, decrypt, and download the original file.

Theme switching remains consistent across all screens.

★ 1. Page Layout Structure

Clean Two-Section Layout:

- Top Area: Header + Theme Switcher
- Left Column (Primary): Retrieval input + process steps
- Right Column (Secondary): File metadata + retrieval logs

Light Mode Background:

#F7F9FC

Dark Mode Background:

#0D1117

★ 2. Page Header

Same style as dashboard, with:

Title:

“Retrieve Your File”

- Poppins SemiBold, 28px
- Light: #1A1A1A
- Dark: #F4F6F8

Subheading:

“Enter your file hash or CID to fetch and decrypt the data.”

- Light: #6A6A6A
- Dark: #A8B3C0

Theme Switcher (top-right):

- 🌙 → Dark
- ☀️ → Light
- Toggle transition: 300ms

★ 3. File Hash Input Card

Card (Light Mode):

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 20px
- Padding: 28px

Card (Dark Mode):

- Background: #161B22
- Border: 1px solid rgba(255,255,255,0.08)

Inside the Card:

Label:

“File Hash / CID”

- Light: #3A3A3A
- Dark: #D9E1E9

Input Field:

- Height: 56px
- Radius: 14px
- Font: 16px
- Light:
 - Background: #FAFAFA
 - Border: rgba(0,0,0,0.08)
- Dark:
 - Background: #1B2231
 - Border: rgba(255,255,255,0.08)

Retrieve Button:

“Retrieve File →”

- Full width
- Height: 56px
- Gradient: #4A65F6 → #8A4DFF
- Text: white
- Radius: 12px
- Glow shadow
- Disabled state before hash entry

★ 4. Retrieval Process Stepper

Displays the retrieval pipeline from your System Workflow PDF (Page 3).

Steps:

1. Query Metadata from Blockchain
2. Identify Chunk Locations
3. Request Chunks from Peers
4. Verify & Reassemble Chunks
5. AES-256 Decryption
6. File Ready to Download

Light Mode:

- Active step: blue/purple gradient
- Inactive: #C7C7C7
- Icons: outlined, grey
- Connecting line: light grey

Dark Mode:

- Active step: neon purple/blue
- Inactive: #555C66
- Icons: neon outline
- Connecting line: #2C3441

★ 5. Animated Progress Loader

Light Mode:

- Track: #E6EAF1
- Fill: gradient(blue → purple)
- Glow: subtle

Dark Mode:

- Track: #212732
- Fill: neon purple
- Glow: rgba(138,77,255,0.6)

Has step-by-step text:

- “Checking blockchain metadata...”
- “Fetching chunk 1/12...”
- “Verifying chunk signatures...”
- “Decrypting with AES-256...”
- “Preparing final file...”

★ 6. Right Column — File Metadata Card

Visible only after successful hash verification.

Light Mode:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 20px

Dark Mode:

- Background: #1B2231
- Border: 1px solid rgba(255,255,255,0.05)

Metadata:

- File Name
- Original Size
- Total Chunks
- Replication Factor
- File Hash
- Upload Timestamp

Monospace font for hash:

- Light: #444
- Dark: #B7C1D0

★ 7. Peer Sources Table (Chunks Origin)

Table headers:

- Chunk ID
- Peer ID
- Location
- Reputation
- Status

Light:

- Header bg: #F3F5FB
- Row bg: #FFFFFF alternating

Dark:

- Header bg: #232A36
- Row bg: #161C26 alternating
- Neon purple highlight on selected row

★ 8. Download File Card

Once retrieval is complete:

Light Mode:

- Background: #ECF8ED
- Border: 1px solid #B6E7BC
- Icon: green check

Dark Mode:

- Background: #112F18
- Border: 1px solid #2BAE44
- Icon: neon green check

Download Button:

“Download File”

- Gradient button
- Full width
- Radius: 12px

★ 9. Security Notice

Already described in your PDFs:

Data is encrypted before upload → only decrypted on client device.

Text:

“Your file was decrypted locally using AES-256. Your private key was never shared.”

Light: #6A6A6A

Dark: #909BAA

Retrieve File Page — High-Fidelity (Light + Dark Mode) COMPLETED

This page now matches:

- Your architecture diagrams
- Your HTML prototype
- Your PDFs (System Workflow + Security Features)
- Your dashboard design

High-Fidelity Page 7 — Wallet & Transactions Page (Light + Dark Mode)

This page gives users a clear financial overview of their decentralized storage activity. Includes theme toggle (Light / Dark mode) at the top-right like all other pages.

★ 1. Page Layout Structure

Three main sections:

1. Top Summary Cards
2. Transaction Filters
3. Transaction List / Ledger View

Theme toggle (☀️ / 🌙)

Top-right corner, persistent.

★ 2. Page Header

Title:

“Wallet & Transactions”

- Poppins SemiBold 28px
- Light: #1A1A1A
- Dark: #F4F6F8

Subtitle:

“Track your token balance, storage rewards, and transaction history.”

- Light: #6A6A6A
- Dark: #9DA7B3

★ 3. Summary Cards (3-column layout)

Card 1 — Current Balance

- Big number (e.g., 3,450 DST)
- Gradient background
 - Light: #4A65F6 → #8A4DFF
 - Dark: #8A4DFF → #4A65F6
- Text: white
- Border-radius: 20px
- Shadow: deep glow

Sub-info:

- “≈ \$XX.XX USD” (converted rate)

Card 2 — Total Credits

- Icon: arrow-down green
- Number: green text (#11A870)
- Light Mode:

- Background: #ECFDF3
- Border: #C6F6D5
- Dark Mode:
 - Background: #113322
 - Border: #1F6B3F

Footer text:

“Earned from storage, bandwidth, mining”

Card 3 — Total Debits

- Icon: arrow-up red
- Number: red text (#D14545)
- Light Mode:
 - Background: #FEECEC
 - Border: #F8C7C7
- Dark Mode:
 - Background: #341919
 - Border: #8A3B3B

Footer text:

“Spent on uploads & transfers”

★ 4. Filter Tabs (Horizontal)

Tabs:

- All
- Credits
- Debits
- Storage Rewards
- Upload Costs
- Mining Rewards
- Transfers

Light Mode:

- Active: blue-purple gradient underline
- Inactive: #888

Dark Mode:

- Active: neon purple underline
- Inactive: #939AA5

Spacing: 28px between tabs.

★ 5. Transaction List (Ledger View)

Layout:

Each transaction card contains:

- Icon
- Type label
- Amount
- Timestamp
- Transaction hash
- Category badge
- Peer ID (if applicable)

★ 6. Transaction Card UI

Light Mode:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 16px
- Hover: subtle shadow

Dark Mode:

- Background: #161B22
- Border: 1px solid rgba(255,255,255,0.05)
- Hover: neon glow

★ 7. Transaction Card Content

Example:

Left Side

“Storage Reward”

- Font: SemiBold 16px
- Light: #1A1A1A
- Dark: #E6EDF3

Category Badge:

“storage”

- Light: #E8F2FF
- Dark: #2E3650

Right Side

+54 DST

- Green if credit
- Red if debit
- Font: SemiBold 18px

Timestamp:

- Light: #8A8A8A
- Dark: #9AA4B1

Footer Row

Monospace hash:

0x8f4e12d9a...c1f9

Peer info (if transfer):

To: peer-013

★ 8. Pagination (Bottom)

Light Mode:

- Numbers: #4A65F6
- Dots: #C7C7C7
- Next/Prev: gradient button

Dark Mode:

- Numbers: #C9D1D9
- Glow on active number
- Next/Prev: neon outline

★ 9. Extra Feature: Export CSV Button

Button:

“Export Transactions (.csv)”

- Light: outlined #4A65F6
- Dark: outlined neon blue

Located at top-right of transaction panel.

★ 10. Theme Behavior

Toggling theme updates:

- Background
- Borders
- Text colors
- Icons
- Gradients
- Glow effects
- Table/grid colors
- Hover states

Smooth 250ms fade transition.

Wallet & Transactions Page — High-Fidelity (Light + Dark Mode) COMPLETE

This page now provides a professional, Web3-grade financial dashboard.

High-Fidelity Page 8 — Storage Contribution Page (Light + Dark Mode)

This is a major screen in your decentralized storage system because users act as storage providers (nodes).

This page controls:

- How much storage a user shares
- Node status and performance
- Earnings based on storage contributed
- Node uptime & reliability score
- Light/Dark theme toggle

Let's begin.

★ 1. Page Layout Structure (1440px Grid)

Three core sections:

1. Top Summary Bar — Node ID, online status, uptime
2. Storage Contribution Control — slider + metrics
3. Earnings / Performance Insights — history graph + stats

Theme toggle (☀️/🌙) remains on the top-right.

★ 2. Page Header

Title:

“Storage Contribution Settings”

- Poppins SemiBold, 28px
- Light: #1A1A1A
- Dark: #F4F6F8

Subtitle:

“Configure how much space you want to share and monitor your node’s performance.”

- Light: #6A6A6A
- Dark: #9AA5B3

★ 3. Node Summary Bar

Light Mode:

- Background: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Radius: 16px
- Shadow: very subtle

Dark Mode:

- Background: #161B22
- Border: 1px solid rgba(255,255,255,0.06)

Content (4 Columns):

1. Node ID — e.g., *peer-2713*
2. Status — green dot “Online”
3. Uptime — “23h 52m”
4. Network Peers — “247 Active Peers”

★ 4. Storage Contribution Control (Main Panel)

Container:

- Light: #FFFFFF

- Dark: #1B2231
- Radius: 20px
- Padding: 32px

★ A. Storage Slider

Label:

“Amount of Storage to Contribute”

Slider Range:

- 1 GB → 500 GB

Light Mode:

- Track: #E4E8EE
- Fill: #4A65F6
- Thumb: white circle, drop shadow

Dark Mode:

- Track: #2C3441
- Fill: #8A4DFF
- Thumb: neon glow

Value Bubble (Above Thumb):

“120 GB”

- Light: white bubble with shadow
- Dark: #161B22 bubble with neon outline

★ B. Storage Metrics Grid (3 Columns)

Each metric card:

Light Mode:

- BG: #F8FAFF
- Border: #DCE5FF
- Text: #1A1A1A

Dark Mode:

- BG: #121820
- Border: rgba(255,255,255,0.04)
- Text: #D6DFE8

Cards:

1. Provided Storage
2. Used by Network
3. Remaining Capacity

Example Numbers:

- Provided: 120 GB
- Used: 87 GB
- Free: 33 GB

★ C. Storage Utilization Bar

Light Mode:

- Track: #E6EEF5
- Fill: green gradient (#2ECC71 → #27AE60)

Dark Mode:

- Track: #262E3A
- Fill: neon green

★ 5. Node Performance Insights

A second card that includes:

A. Node Reliability Score

(0–100 system)

Light Mode:

- Badge: green (#D4F8E7)
- Text: #1A1A1A

Dark Mode:

- Badge: neon green border
- Text: #D6FFD8

B. Bandwidth Served Today

(E.g., 2.7 GB uploaded, 1.1 GB downloaded)

Light Mode:

- Icon: #4A65F6

- Text: #444

Dark Mode:

- Icon: #8A4DFF
- Text: #C9D1D9

C. Earnings Summary

Earned This Week:

+128 DST

Earned This Month:

+431 DST

Light Mode:

- Green text for positive earnings
- Small line chart (blue)

Dark Mode:

- Neon lime green text
- Chart in neon purple

★ 6. Earnings Graph (Mini Chart)

A simple sparkline or mini line graph:

Light:

- Background: #FFFFFF
- Line: #4A65F6

Dark:

- Background: #161B22
- Line: neon purple

Shows:

- Daily earnings
- Storage allocated
- Reliability trend

Tabs:

- Week

- Month
- Year

★ 7. Auto-Start Node Toggle

Label:

“Start Node Automatically on Launch”

Light:

- Toggle track: #E3E6EE
- Thumb: white

Dark:

- Track: #2C3441
- Thumb: neon glow

When ON:

- Light: Fill → #4A65F6
- Dark: Fill → #8A4DFF

★ 8. Save Button

“Save Settings”

- Height: 52px
- Full width
- Gradient: blue → purple
- Radius: 12px
- Light text: white
- Dark text: white (with glow effect)

🎉 Storage Contribution Page — COMPLETE (Light + Dark Mode)

You now have a production-ready storage node configuration UI that perfectly matches Filecoin, Storj, and Sia-grade design standards.

🎨 High-Fidelity Page 9 — Admin Login (Light + Dark Mode)

This is the secure login screen for administrators only, separate from user login and styled for professionalism, minimalism, and absolute clarity.

This page includes:

- Username + password login
- Optional 2FA prompt
- Enterprise-grade styling
- Light and Dark mode toggle

Let's design it.

★ 1. Overall Look & Feel

Admin pages must appear:

- Trustworthy
- High-security
- Minimal
- No playful elements
- No gradients in text
- Strict colors

The aesthetic matches enterprise dashboards used by AWS, Azure, Hyperledger Console, etc.

★ 2. Page Layout

Centered login card

Canvas background:

- Light: #F5F7FA
- Dark: #0D1117

Login card:

- Width: 440px
- Padding: 40px
- Radius: 20px
- Light:
 - BG: #FFFFFF
 - Border: 1px solid rgba(0,0,0,0.08)
- Dark:
 - BG: #161B22
 - Border: 1px solid rgba(255,255,255,0.06)

★ 3. Header + Brand Zone

At the top of the card:

Icon:

Admin shield icon (outline)

Text:

“Admin Portal Access”

- Poppins SemiBold, 26px
- Light: #1A1A1A
- Dark: #FFFFFF

Subtitle:

“Restricted access. Authorized personnel only.”

- Light: #6A6A6A
- Dark: #8A96A5

Spacing: 18px

★ 4. Light/Dark Mode Toggle

Top-right of screen, global across admin pages.

Toggle style:

- Same as other pages:
 - 🌙 to enable dark
 - ☀️ to enable light

Transitions: 250ms.

★ 5. Admin Login Form

A. Username Input

Label: “Admin Username”

- Light: #333
- Dark: #BFC9D8

Input field:

- Height: 52px
- Radius: 12px
- Light:
 - Background: #FAFAFA
 - Border: 1px solid rgba(0,0,0,0.08)
- Dark:
 - Background: #1B2231
 - Border: 1px solid rgba(255,255,255,0.08)

B. Password Input

- Same styling as username
- Icon:  lock-outline + password reveal toggle

★ 6. “Admin Login” Button

Light Mode:

- Gradient background: #4A65F6 → #8A4DFF
- Text: white
- Radius: 12px
- Height: 54px
- Shadow: 0 12px 24px rgba(76,90,255,0.25)

Dark Mode:

- Background: neon gradient
- Glow: 0 0 16px rgba(138,77,255,0.6)
- Text: white

Disabled state (empty fields):

- Light: #C7C7D2
- Dark: #2B3040

★ 7. Optional: 2-Factor Authentication Modal

After clicking login, if 2FA is enabled:

Modal:

- Light: white
- Dark: #161B22
- Radius: 20px
- Centered

Content:

Enter your 6-digit authentication code

- Input boxes (6 squares)
- “Verify” button (gradient)

★ 8. Footer Links

Centered under card:

- “Forgot Password?”
- “Return to User Login”

Light:

- Color: #4A65F6
- Hover underline

Dark:

- Color: #8A4DFF
- Glow on hover

★ 9. Security Notice (Bottom of Page)

Small text:

“All actions are logged on Hyperledger Fabric for audit and compliance.”
(follows your project PDF)

Light:

- Color: #7A7A7A

Dark:

- Color: #9AA3AE

🎉 Admin Login Page — High-Fidelity (Light + Dark Mode) COMPLETE

This screen now matches enterprise-grade admin consoles and your decentralized system’s security philosophy.

High-Fidelity Page 10 — Admin Global Dashboard (Light + Dark Mode)

This is the *heart* of the admin-side interface.

Your administrators will use this screen to:

- Monitor system-wide health
- Track active peers
- View global storage and performance metrics
- See blockchain activity
- Audit the decentralized network
- Manage alerts

This design must look enterprise-grade, similar to AWS Console, Hyperledger Explorer, or Kubernetes Dashboard.

Let's build it.

★ 1. Layout Overview (1440px Grid)

Three main areas:

1. Top Navigation Bar
2. Admin Summary Metrics (4–5 cards)
3. Two-Column Workspace
 - Left: Network + Storage metrics
 - Right: Blockchain stats + Alerts

Light/Dark toggle is at the top-right.

★ 2. Navigation Bar

Light Mode:

- Background: #FFFFFF
- Border-bottom: 1px solid rgba(0,0,0,0.06)

Dark Mode:

- Background: #0F131A
- Border-bottom: 1px solid rgba(255,255,255,0.08)

Items (Left):

- Dashboard (active)

- Network
- Blockchain
- Alerts
- Settings

Items (Right):

- Theme toggle (☀️/🌙)
- Admin avatar
- Dropdown menu (Logout, Profile, Audit Logs)

★ 3. Summary Metrics Bar

Row of 5 high-level KPIs:

Cards (Light Mode):

- BG: #FFFFFF
- Border: rgba(0,0,0,0.06)
- Radius: 18px
- Shadow: subtle

Cards (Dark Mode):

- BG: #161B22
- Border: rgba(255,255,255,0.05)
- Glow on hover

KPIs:

1. Active Peers

- Icon: nodes
- Number: 247
- Trend: +3.2% today

2. Total Storage Capacity

- Icon: database stack
- Number: 8.2 TB
- Trend: +14% this week

3. Storage Utilized

- Icon: pie-chart
- Number: 5.6 TB used

4. Blockchain TPS

- Icon: network graph
- Number: 153 TX/min

5. Smart Contract Health

- Icon: check-shield
- Status: “Healthy” (green badge)

★ 4. Left Column — Network Overview Panel

A large card containing real-time network metrics:

● A. Peer Distribution Map

Light Mode:

- Map background: light grey (#F3F5FB)
- Nodes: blue dots

Dark Mode:

- Map background: #1A1F2A
- Nodes: neon purple dots

Visualizes:

- US-East
 - EU-West
 - Asia-Pacific
 - India region
- ...with number of peers per region.

● B. Peer Health Table

Columns:

- Peer ID
- Status (Online / Offline)
- Uptime
- Storage Shared
- Reputation Score

Light:

- Row background alternating: #FFFFFF / #F7F9FC
- Active color: green
- Offline color: red

Dark:

- Row background alternating: #161B22 / #1D242F
- Active: neon green
- Offline: neon red

● C. System-Wide Bandwidth Graph (Line Chart)

Light:

- BG: #FFFFFF
- Line: blue (#4A65F6)
- Gridlines: faint grey

Dark:

- BG: #161B22
- Line: neon purple
- Gridlines: #2F3541

Shows:

- Upload bandwidth
- Download bandwidth

Tabs: 1h / 24h / 7d / 30d

★ 5. Right Column — Blockchain Overview Panel

● A. Hyperledger Fabric Stats Card

Large card with:

- Current Block Height
- Transactions Today
- Average Block Time
- Smart Contract Version

Light:

- BG: #FFFFFF
- Border: rgba(0,0,0,0.06)

Dark:

- BG: #141820

- Border: `rgba(255,255,255,0.05)`

● B. Recent Blockchain Transactions Table

Columns:

- Tx Hash
- Executor Node
- Time
- Type (Upload, Reward, Verification)
- Gas Used

Tx hash: monospace

Tx type color coding:

- Green = reward
- Purple = file metadata
- Orange = validation

● C. Smart Contract Alert Panel

Alert Types:

- Contract update required
- High-latency event detected
- Abnormal peer behavior
- Storage imbalance

Light mode:

- BG: `#FFF3F3` (critical), `#FFF8E5` (warning), `#EDF8FF` (info)

Dark mode:

- BG: `#3A1D1D` (critical), `#3A331D` (warning), `#1D273A` (info)

★ 6. Global Controls Panel (Top-Right of Dashboard)

Buttons:

Light Mode:

- “Refresh Network” → blue outline
- “Download Report (.pdf)” → grey outline
- “Manage Protocol Settings” → gradient

Dark Mode:

- Neon gradient outlines
- Glow buttons

★ 7. Footer

Light:

- Text: #9AA0AC
- “© 2026 DecentraStore Admin Console”

Dark:

- Text: #758093

🎉 Admin Global Dashboard — High-Fidelity (Light + Dark Mode) COMPLETE

This is now a fully production-grade, enterprise-level admin dashboard design.

🎨 High-Fidelity Page 11 — Network Monitoring Page (Light + Dark Mode)

This is one of the most critical admin pages.

Administrators use it to inspect the live decentralized network:

- Peer nodes
- Latency
- Storage load
- Peer uptime
- Geographic distribution
- Alerts
- P2P performance visualization

This screen should feel like a blend of:

Kubernetes Dashboard + Hyperledger Explorer + Storj Satellite Console

★ 1. Page Layout Structure (1440px grid)

Sections:

1. Page Header + Theme Toggle

2. **Network Status Overview Cards**
3. **Live P2P Network Map**
4. **Peer List Table**
5. **Node Health Timeline / Chart**
6. **Real-Time Alerts Panel**

★ 2. Page Header

Title:

“Network Monitoring”

- Light: #1A1A1A
- Dark: #F6F9FB

Subtitle:

“Live analytics of all nodes participating in the decentralized storage network.”

- Light: #6A6A6A
- Dark: #9AA5B3

Theme toggle button stays at the top-right.

★ 3. Network Status Overview Cards (4 cards)

Metrics:

1. **Total Active Nodes** (e.g., 247)
2. **Average Latency** (e.g., 42 ms)
3. **Storage Load Distribution** (58% global usage)
4. **Network Health Score** (“Healthy”, “Degraded”, etc.)

Light Mode:

- Background: #FFFFFF
- Border: rgba(0,0,0,0.06)
- Shadow: subtle
- Icons: blue (#4A65F6), green (#2ECC71)

Dark Mode:

- Background: #161B22
- Border: rgba(255,255,255,0.05)
- Icons: neon purple + neon green
- Glow on hover

★ 4. Live P2P Network Map (centerpiece)

Shows the connections between peers globally.

Light Mode:

- Map background: soft grey (#EEF1F7)
- Node dots: blue (#4A65F6)
- Connections: thin lines (#B8C7E5)

Dark Mode:

- Map background: #11171F
- Node dots: neon purple (#9B66FF)
- Connections: #36415A

Node hover tooltip:

- Peer ID
- Region
- Uptime
- Storage Shared
- Latency

Tooltip style:

- Light: white, shadow
- Dark: #1E2430 with neon outline

★ 5. Peer List Table (detailed network view)

Columns:

- Peer ID
- Region
- Uptime
- Latency
- Storage Shared
- Reputation Score
- Status

Light Mode:

- Header BG: #F3F5FB
- Row BG: alternating #FFFFFF / #F9FAFB
- Online status: green dot
- Offline status: red dot

Dark Mode:

- Header BG: #232A36
- Row BG: alternating #161C26 / #1D242F
- Online: neon green
- Offline: neon red

Row hover:

- Light: subtle grey shadow
- Dark: neon purple inner shadow

★ 6. Node Health Timeline (Line Chart)

This chart shows:

- Latency over time
- Node availability
- P2P communication failures
- Data transfer rates

Light Mode:

- Chart BG: #FFFFFF
- Line color (latency): #4A65F6
- Line color (failures): #D14545
- Gridlines: #E6EAF1

Dark Mode:

- Chart BG: #161B22
- Latency line: neon purple
- Failure line: neon red
- Gridlines: #2F3541

★ 7. Real-Time Alerts Panel

Alert types:

- ⚠ Slow responding node
- 🔥 Potential DDoS pattern
- 🗄 Overloaded storage region
- 🔄 Node reconnection attempts
- 🕒 Blockchain sync delay

Light Mode:

- Critical: #FEECEC
- Warning: #FFF8E5
- Info: #EDF8FF

Dark Mode:

- Critical: #3A1D1D
- Warning: #3A331D
- Info: #1D273A

Alert card info:

- Title
- Description
- Timestamp
- Node ID
- Severity badge

★ 8. Action Buttons (Admin Controls)

Located at top-right of content area:

- Refresh Network (outline button)
 - Light: blue outline
 - Dark: neon outline
- View Logs (open Blockchain Logs page)
 - Light: grey outline
 - Dark: neon grey
- Export Network Report (.csv)
 - Light: icon + text
 - Dark: icon + neon

Network Monitoring Page — High-Fidelity COMPLETE

You now have a fully designed network observability dashboard with light/dark mode support.

High-Fidelity Page 12 — Blockchain Logs Page (Light + Dark Mode)

This is one of the most technical and important admin pages.

Admins use it to:

- Inspect Hyperledger Fabric transactions
- View file metadata writes
- Check CID mappings
- Inspect smart contract events
- Debug uploads, retrievals, and node identities
- Maintain regulatory / audit compliance

This page resembles tools like:

- Hyperledger Explorer
- Blockscout
- Etherscan internal view
- Kubernetes audit logs

Let's design.

★ 1. Page Structure (1440px Grid)

Sections:

1. Page Header + Theme Toggle
2. Blockchain Overview Cards
3. Blocks Timeline (or Block List)
4. Transactions Table
5. Filter Panel
6. Detailed Transaction Sidebar (Drawer)

★ 2. Page Header

Title:

“Blockchain Logs”

- Poppins SemiBold, 28px
- Light: #1A1A1A
- Dark: #F4F6F9

Subtitle:

“View all ledger transactions recorded by Hyperledger Fabric.”

- Light: #6A6A6A
- Dark: #9AA5B3

Theme toggle stays top-right.

★ 3. Blockchain Overview Cards (4 cards)

Metrics:

1. Current Block Height
2. Transactions Today
3. Average Block Time
4. Smart Contract Version

Each card contains icon + value + subtext.

Light Mode:

- BG: #FFFFFF
- Border: rgba(0,0,0,0.06)
- Radius: 18px
- Shadow: subtle

Dark Mode:

- BG: #161B22
- Border: rgba(255,255,255,0.05)
- Glow on hover

★ 4. Blocks List (Left Column)

A vertical list of recent blocks.

Block Card:

- Block number (#102,394)
- Timestamp
- Number of Transactions
- Proposer Node
- Expand Arrow

Light Mode:

- BG: #FFFFFF
- Border: #E6EAF1

Dark Mode:

- BG: #1A1F2A
- Border: rgba(255,255,255,0.05)

Active block (selected):

- Light: blue outline
- Dark: neon purple outline

★ 5. Transactions Table (Right Column)

This is the center of the UI.

Table Columns:

- Tx Hash
- Action Type
- Smart Contract Function
- Executed By
- Timestamp
- Status
- Gas / Compute Units
- CID (if file upload or retrieval)

Light Mode:

- Header BG: #F3F5FB
- Row BG alternating: #FFFFFF / #F9FAFB
- Text: #333

Dark Mode:

- Header BG: #232A36
- Row BG alternating: #161C26 / #1D242F
- Text: #C9D1D9

Tx Hash Styling:

Monospace:

0x845a1f9dcd...03b9

- Light: #444
- Dark: #8CA3B7

Action Types (Badges):

Action	Light Mode BG	Dark Mode BG	Text Color
File Upload	#E1E7FF	#2D3250	Blue/Purple
Metad ata Updat e	#FFF4D6	#3C3120	Orange
Chunk Verific ation	#E1FFF4	#204033	Green
Access Retriev al	#FEE2E2	#3A1D1D	Red

Node	#EAF8	#1E273	Teal
Registr ation	FF	3	

★ 6. Filtering Panel

A horizontal filtering bar above the table.

Filters:

- By Action Type (dropdown)
- By Peer ID
- By Date Range
- By Status
- Search bar: “Search tx hash...”

Light Mode:

- BG: #FFFFFF
- Border-bottom: rgba(0,0,0,0.05)

Dark Mode:

- BG: #141820
- Border-bottom: rgba(255,255,255,0.07)

★ 7. Transaction Detail Drawer (Right Side)

Opens when clicking a transaction.

Drawer Width:

480px

Slides from the right with animation.

Light Mode:

- BG: #FFFFFF
- Border-left: rgba(0,0,0,0.08)

Dark Mode:

- BG: #1A1F2A
- Border-left: rgba(255,255,255,0.08)

Drawer Sections:

A. Transaction Summary

- Hash
- Timestamp
- Block Number
- Status

B. Smart Contract Event Log

List of events like:

- FileHashStored
- MetadataRegistered
- ChunkVerified

C. Metadata Section

If file upload:

- CID
- Encrypted Chunk Count
- File Hash
- User ID

D. JSON Payload (Raw)

Expandable JSON viewer:

- Light: #F7F7F7
- Dark: #121820

```
{  
  
  "cid": "bafybeigpm...",  
  
  "owner": "peer-081",  
  
  "chunks": 12,  
  
  "timestamp": 1731422200  
}
```

★ 8. Export Buttons

Top-right of table:

- Export Transaction History (.csv)
- Export Contract Logs (.json)

Light Mode:

- Outline: #4A65F6

Dark Mode:

- Outline: neon purple

★ 9. Pagination Controls

Standard bottom pagination.

🎉 Blockchain Logs Page — High-Fidelity COMPLETE

This is now a production-grade enterprise blockchain audit dashboard.

🎨 High-Fidelity Page 13 — Protocol Settings Page (Light + Dark Mode)

This is the most sensitive page in the entire system.

Only admins can modify the following:

- Replication factor
- Chunk size
- Peer selection strategy
- Incentive rates
- Auto-healing interval
- Network throttling
- Node penalties
- Smart contract toggles
- Experimental features

This must look highly professional, with clear warnings and safe defaults.

★ 1. Page Structure

Sections:

1. Header + Theme Toggle
2. General Storage Settings
3. P2P Network Settings
4. Incentives & Tokenomics
5. Auto-Healing & Verification
6. Smart Contract / Ledger Options
7. Save / Reset Controls

★ 2. Page Header

Title:

“Protocol Settings”

- Light: #1A1A1A
- Dark: #F4F6F8

Subtitle:

“Configure global parameters affecting all nodes and users.”

- Light: #6A6A6A
- Dark: #9AA5B3

Theme toggle on the top-right (consistent across admin pages).

★ 3. Settings Panels Style

Light Mode:

- Panel BG: #FFFFFF
- Border: 1px solid rgba(0,0,0,0.06)
- Shadow: soft
- Text: #1A1A1A

Dark Mode:

- Panel BG: #161B22
- Border: 1px solid rgba(255,255,255,0.06)
- Text: #DCE2EA

Panels use:

- Radius: 20px
- Padding: 28–32px
- Section titles in Poppins SemiBold

★ 4. Settings Section A – Storage & Redundancy

1. Replication Factor (Dropdown)

Options:

- 2 – Minimum
- 3 – Recommended
- 5 – High Security
- 7 – Enterprise

2. Erasure Coding Scheme (Dropdown)

- Disabled
- Reed-Solomon 4+2
- Reed-Solomon 10+4
- LRC (Local Reconstruction Codes)
- Experimental modes (warning badge)

3. Chunk Size (Dropdown)

- 512 KB
 - 1 MB
 - 4 MB
 - 16 MB
- Tooltips included.

★ 5. Settings Section B – Peer Selection Algorithm

Dropdown:

- Auto (default)
- Geographical
- Latency-Optimized
- Reputation-Based
- Randomized (experimental)
- Hybrid (AI-assisted)

Additional slider:

Minimum Peer Reputation Score

Range: 0 → 100

★ 6. Settings Section C – Incentives & Tokenomics

This aligns with:

- Storage Proofs (future scope from PDF)
- Token rewards
- Node reliability

1. Storage Reward Rate

(e.g., 2.5 DST / GB / day)

2. Bandwidth Reward Rate

(e.g., 0.4 DST / GB served)

3. Penalty Rate (for downtime)

Slider: 0% → 20%

Light: blue fill

Dark: neon purple fill

4. Minimum Uptime Requirement

Numeric: 85%–99%

★ 7. Settings Section D – Auto-Healing System

Toggles:

- Enable auto-healing
- Enable chunk verification loop
- Enable self-repair for corrupted chunks

Select:

Healing Interval

- 30 minutes

- 1 hour
- 6 hours
- 24 hours

Light:

- Switch track: #E6E6E6
- On: #4A65F6

Dark:

- Track: #2D3842
- On: neon purple

★ 8. Settings Section E – Smart Contract & Ledger Controls

Toggles:

- Enable metadata encryption
- Enable compressed ledger writes
- Enable event emission logs
- Strict mode: force chunk verification on every retrieval

Dropdown:

Smart Contract Update Channel

- Stable
- Beta
- Developer (warning)

Ledger retention:

- Store full logs
- Archive old blocks
- Prune every X days

★ 9. Section F – Advanced Settings (Danger Zone)

Red-bordered panel:

Options:

- Reset peer reputations

- Reset reward pool
- Force contract redeploy
- Purge inactive nodes

Confirmation UI:

Requires typing:

I understand the risk.

Light:

- BG: #FFF5F5
- Dark:
- BG: #3A1D1D

★ 10. Save & Reset Buttons

Save Settings:

- Full-width
- Gradient (blue → purple)
- Radius: 12px
- Light: normal
- Dark: glow

Reset to Defaults:

- Outline red
- Light: #D14545
- Dark: neon red

Buttons pinned at panel bottom.

Protocol Settings Page — High-Fidelity COMPLETE

This finishes the entire 13-page UI/UX system — all in light & dark theme, consistent, enterprise-grade, and ready to build in Figma.
